PROFILE

Computer Science undergraduate at ESLSCA University with a strong foundation in software engineering, data systems, and financial technology. Experienced in e-commerce operations, sales leadership, and digital business support. Skilled across the full development stack with applied knowledge of machine learning, blockchain, and big data — positioned to bridge technical depth with business insight in fast-paced fintech environments.

EDUCATION

Bachelor of Computer Science

ESLSCA University · Cairo, Egypt | 2024 – Present

- Relevant coursework: AI, Applied Machine Learning, Big Data Analysis, Introduction to Blockchain & Fintech, IoT, Cloud Computing, Data Structures, Database Systems, Agile/Scrum/DevOps
- Also studying: Fundamentals of Accounting, Supply Chain Management, Entrepreneurship, Disruptive Technologies

High School Diploma — American System

|

GPA: 3.92 · ACT: 22

EXPERIENCE

Technical Operations & Digital Support

Lisa Zahya Coaching · New York, USA (Remote) | 2025 – Present

- Managed end-to-end digital business operations supporting a US-based coaching firm
- Maintained backend systems, automated online workflows, and resolved technical infrastructure issues
- Coordinated cross-functional digital processes ensuring platform uptime and data integrity

Sales Supervisor

Winhouse · Cairo, Egypt | Jan 2024 – Jan 2025

- Led and managed a team of 12 sales representatives across daily operations
- Drove measurable improvements in team sales performance and customer satisfaction metrics
- Reported directly to senior management with weekly performance analytics

Social Media Manager

Athotel · USA (Remote) | Jun 2023 – Dec 2023

- Grew audience engagement by 25% through targeted digital campaigns
- Managed paid ad strategies and lead generation pipelines for hospitality brand

PROJECTS

Student Performance Prediction Model

Python · Machine Learning · Power BI | 2025

- Built a supervised ML model to predict academic outcomes using classification algorithms
- Visualised key drivers in an interactive Power BI dashboard for institutional use

Sports Image Classification System

Python · TensorFlow · ResNet50 · MobileNetV2 | 2025

- Developed a multi-class CNN using transfer learning (ResNet50, MobileNetV2, EfficientNetB0)
- Achieved high accuracy on a Kaggle sports dataset with full model evaluation pipeline

Fashion-MNIST Deep Learning Classifier

Python · Keras · CNN | 2025

- Designed and trained a convolutional neural network for 10-class fashion item recognition

Blockchain Smart Contract (Escrow)

Solidity · Remix IDE | 2025

- Developed and debugged a two-party escrow smart contract with full test coverage
- Applied knowledge from Introduction to Blockchain & Fintech coursework

Dynamic Web Applications

PHP · HTML · CSS · JavaScript · SQL | 2024–2025

- Built full-stack web applications with database-backed dynamic content
- Applied REST principles, form validation, and responsive design across projects

TECHNICAL SKILLS

Languages	Python · SQL · PHP · Java · C# · HTML · CSS · JavaScript
Data & ML	Machine Learning · Deep Learning (CNN/Transfer Learning) · Power BI · Tableau · Excel
Fintech	Blockchain (Solidity) · Smart Contracts · Crypto Markets · Accounting Fundamentals
Cloud & Dev	Cloud Computing · IoT Systems · Agile/Scrum · DevOps · Git / GitHub
Databases	MySQL · Database Management · Database Systems & Administration

LANGUAGES

Arabic (Native) · English (Fluent) · French (Intermediate — 4 semesters)
